DETAILED ACTION

1. Claims 74-88 are presented for examination.

Allowable Subject Matter

2. Claims 74-88 are allowable.

The present invention is directed to an electronic bill payment system.

The closest prior art are: Lawlor et al.(5,220,501 hereinafter Lawlor) , article titled "Baxter Healthcare Prepares to transition ASAP from proprietary Format to X.2 Standard hereinafter Baxter" and George Thomas et al. (WO 99/56219 hereinafter Thomas).

Lawlor discloses a similar system in which the payors, consumers or buyers use a third party system to pay their bills. The payor delivers the bill data to the third party bill payment system.

Baxter teaches the vendors sending electronic invoices through the EDI gateway system. The invoices or bills are sent through the system directly from the biller.

Thomas teaches a user receives his bills from a biller and sends the bills to a third party system. The payor providing the bill payment data to the third party.

The prior art alone or in combination fails to teach **"communicating with the payee and receiving for use, bill data electronically delivered from said payee to the third party without payor intervention"** This patentable distinction is included in independent claim 74.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
